

GTI Viewing Systems for Soft-Proofing

Premier solutions from desktop to press room

Soft-proofing represents an exciting opportunity to shorten the production cycle, while improving communications between color image service providers and their clients. New tools and technologies have created a platform to reap the benefits of this exciting technology. Critical to the successful implementation of accurate soft-proofing is the viewing environment.

GTI is pleased to offer the following viewing systems designed to assure consistent color appearance throughout the reproduction process and help you implement successful soft-proofing.

Desktop -

PDV-3e/D & PDV-2e/D

Professional Desktop Viewers
Available in two sizes with dimming and side walls.

SOFV-2e & SOFV-1e

Soft-View Premier Desktop Viewers
Digital dimming control allows precise light level control.
Upper and lower illumination ("x" model) enhances light uniformity.

SOFV-1ex

Large Format -

EVS-3552/SP

Executive Viewing Station

Combines a conventional color viewing station with soft-proofing capabilities. Single or dual LCD's (up to 30") can be mounted on rear wall system.* Also available with flat file drawers as model **EVS-3552/SP/FD**.

Additional sizes are also available.

VPI/SP-40

Vertical Print Inspector

Side by side comparison of hard copy proof or press sheet with LCD soft-proof. Allows use of single or dual LCDs up to 30".*

On Press -

MCVE-SP

Modular Color Viewing Environment

Ideal for web press consoles. The MCVE is a custom fit viewing system that adapts to your press console and provides full and variable intensity lighting plus a sliding single or dual LCD mount* that rotates out of the way of the signature panel.

Installed on Goss Console

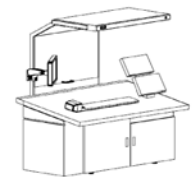

MMP-KVS

Komori Press Console Color Viewing System Accessory

The MMP-KVS is a specially designed add-on to GTI's Komori viewing system that provides full and variable intensity lighting plus a full-motion LCD monitor arm and hood for effective comparison of press sheet to soft-proof.

Installed on Komori Console

All of the above systems are designed to provide optimum viewing and environmental conditions for critical color evaluation and soft-proofing. Should you want additional information or a price quote, please contact GTI at 888-562-7066 or by e-mail at sales@gtiite.com.
